General Comments:

Commissioners and staff encouraged Bayside District Corporation members to participate in the project given their important role in the downtown. They also shared some of the comments heard from the public at the January 22, 2005 workshop about the downtown, light rail opportunities and other visions for the future.

Questions focused on the extent and breadth of the project – i.e., could this change the downtown and how is the City looking at future housing development. Commissioner Johnson emphasized that this is the question being asked of the public, including the BCD and we want to hear from them.

Follow – Up Issues:

No follow-up issues were identified.
